RESEARCH INTERESTS

- Generative Modeling
- Reinforcement Learning

EDUCATION

KAIST, Daejeon, Korea *Sep. 2026 – Present*
M.S. in AI Computing (*Advisor: Prof. Minhyuk Sung*)
Yonsei University, Seoul, Korea *Aug. 2026*
B.S. in Electrical and Electronic Engineering (*GPA: 3.99 / 4.3*)

EXPERIENCE

Visual AI Group, KAIST *Jan. 2026 – Aug. 2026*
Undergraduate Intern (Advisor: prof. Minhyuk Sung)
Exploring online/offline RL of generative model based policies for continuous action planning
CVLAB, Yonsei University *Jan. 2025 – Dec. 2025*
Undergraduate Intern (Advisor: prof. Bumsub Ham)
Participated in weekly research seminars and presented selected papers in AI and computer vision
Yonsei Artificial Intelligence Club, 16th Member *Jul. 2025 – Mar. 2026*
Attended and discussed advanced AI lectures, including MIT 6.5940 (TinyML and Efficient Deep Learning).
Participated in paper reading sessions and group discussions on recent research in AI and computer vision.
Conducted projects on deepfake detection and on-device model optimization for resource-constrained systems.

PUBLICATIONS

Drifting Field Policy: A One-Step Generative Policy via Wasserstein Gradient Flow
Juil Koo, Mingue Park, Jiwon Choi, Yunhong Min, Minhyuk Sung
Advances in Neural Information Processing Systems (NeurIPS), 2026.
Unbalanced W-Flow: Unbalanced Wasserstein Drifting under Finite-Batch Marginal Fluctuations
Jongwook Jeon, Mingue Park, Jiwon Choi, Jaihoon Kim, Yunhong Min, Minhyuk Sung
Under review, 2026.

HONORS AND SCHOLARSHIPS

High Honor, Yonsei University *Fall 2025*
Honor, Yonsei University *Spring 2025*
Merit-based Veritas Scholarship, Yonsei University *Spring 2025, Fall 2024*
Merit-based Scholarship, Hongik University *Fall 2021, Spring 2021*

SKILLS

Languages Korean, English
Programming Python, PyTorch, JAX, C/C++
